

Assessment for Remote Monitoring

Instructions

The ISP/CSSP team should answer all the questions on the assessment with a yes or no and a short explanation. The team should then discuss the individual's needs around each question in more detail using the information included with this form to come to an informed decision on whether or not the individual is appropriate for remote monitoring services. *This assessment is not intended to be scored*, rather it is to be used to guide the decision making process about the appropriateness of remote monitoring services.

The individual must be appropriately supported so that their health and welfare is ensured. If any health or welfare issues are identified, the team will analyze what supports are available to determine if additional supports may enable the use of remote monitoring services while ensuring health and welfare of the individual.

Assessment for Remote Monitoring

Individual's Name: _____ Assessment Completed By: _____ Date: _____

	Indicate the answer to each question and then select the appropriate type of supervision that will safely meet the individual's needs.	Yes	No	If Yes, When & How Often	Could the individual's health and welfare be ensured if this issue was addressed via technology as an alternative to staff?	Comments
1.	Is there a court order that requires 24 hour, on site staffing?*					
	<i>*Note: If "yes" Remote Monitoring with no on-site staff is not appropriate for this individual.</i>					
2.	Does individual have a history of inappropriate sexual behavior that impacts others?					
3.	Does the individual leave or wander away from the home?					
4.	Does the individual engage in gorging, pica, eating raw foods, eating housemates' food or is individual danger to self due to overeating					
5.	Does the individual go into housemates' bedrooms without permission?					
6.	Does the individual destroy property or tamper with other people's belongings?					
7.	Does the individual engage in unsafe smoking, not use an ashtray appropriately or not dispose of matches/butts appropriately?					
8.	Does the individual safely use household appliances?					
9.	Does the individual follow rules about electricity, fire, water, tools, and hazardous physical situations?					

Developed by the State of Ohio in 2011. In 2017 permission granted for use and adaptation by ARRM in Minnesota

	Indicate the answer to each question and then select the appropriate type of supervision that will safely meet the individual's needs.	Yes	No	If Yes, When & How Often	Could the individual's health and welfare be ensured if this issue was addressed via technology as an alternative to staff?	Comments
10.	Does the individual respond appropriately and are they physically able to respond to fire alarms, smoke detectors/carbon monoxide detectors, gas leak and severe weather warnings and exit the residence?					
11.	Does the individual require physical assistance at all times, including repositioning and bathroom assistance?					
12.	Does the individual have seizures or a condition that requires treatment or monitoring?					
13.	Is the individual fearful of being alone?					
14.	Is there a reasonable fear of exploitation of the individual?					
15.	Do all individuals impacted by the remote monitoring technology agree to the service within the home?					
16.	Does the individual understand and demonstrate the ability to secure the home? (lock the doors, answer the door and phone appropriately, not allow strangers in, etc.)					
17.	Can the individual reliably recall and communicate their address and telephone number?					
18.	Does the individual know when, who, and how to call for help or assistance?					
19.	Can and will the individual call 911 or staff if needed?					
20.	Does the individual understand and follow pedestrian safety rules?					
21.	Does the geographic location of the individuals residence inhibit their ability to access emergency services?					

Developed by the State of Ohio in 2011. In 2017 permission granted for use and adaptation by ARRM in Minnesota

	Indicate the answer to each question and then select the appropriate type of supervision that will safely meet the individuals needs	Yes	No	If Yes, When & How Often	Could the individual's health and welfare be ensured if this issue was addressed via technology as an alternative to staff?	Comments
22.	Does the individual interact appropriately around strangers?					
23.	Is the individual receptive to and able to benefit from training on specific areas that may result in decreased supervision?					
24.	Does the individual have a medical condition that requires assistance with routine monitoring (i.e. blood pressure check, insulin check, etc)?					
25.	Does the individual need assistance with medication administration?					
26.	Is the technology and necessary connectivity (e.g. internet bandwidth, etc) available in this community to support remote monitoring?					
27.	Can the individual utilize the technology needed?					
28.	Other issues the team feels impact the individual's ability to receive remote monitoring services?
